

CAREER OBJECTIVE

Final-year Information Technology student with a 9.3/10 CGPA, proficient in Python, SQL, ETL, cloud data engineering, and Agentic AI. Skilled in constructing end-to-end data pipelines using Azure Data Factory, Databricks, PySpark, and Azure Data Lake, as well as developing multi-agent AI systems with LangGraph and LangChain. Eager to contribute to impactful projects, leverage technical expertise, and advance as a technology professional by creating scalable data and AI-driven solutions.

EDUCATION

SIES Graduate School of Technology

Aug 2023 - Jul 2026

BE - Information Technology - Full Time | **CGPA: 9.3/10**

Shiravane Vidyalaya and junior college

Aug 2021 - Apr 2023

12th | Maharashtra | Percentage: **65.17%**

St. Xavier's High School & Jr. College

May 2020 - Aug 2021

10th | Maharashtra State Board of Secondary and Higher Secondary Education | Percentage: **89.00%**

KEY EXPERTISE

Python Sql RAG Git Flask Github Pandas Numpy ETL Azure Data Factory Azure Data Lake

Incremental Loading Backfilling pyspark Databricks LangGraph LangChain

STRONG SUBJECTS: OOPS, DSA, DBMS

PROJECTS

Memora Semantic Learning System

Sep 2025 - Jun 2026

- Developed an AI-powered semantic learning assistant, utilizing Retrieval-Augmented Generation.
- Constructed an intelligent document retrieval pipeline for educational content.
- Enhanced information accessibility through semantic search.
- Produced contextual responses using vector embeddings.

Spotify End-to-End Data Engineering Pipeline — Microsoft Azure

Jul 2026 - Present

- Developed a parameterized, metadata-driven ingestion pipeline in Azure Data Factory to efficiently move data into Azure Data Lake Storage Gen2.
- Implemented incremental loading and backfilling concepts to optimize data processing and minimize redundancy.
- Structured ingested data using a Bronze/Silver/Gold (medallion) architecture, applying data cleaning, transformation, and validation techniques with Azure Databricks and PySpark.

Agentic AI Data Analyst & ETL Automation Agent

Sep 2026 - Sep 2026

- Developed a multi-agent architecture featuring two specialized agents (SQL and ETL) and an LLM-based router to address natural-language data requests.
- Created a 7-stage SQL workflow encompassing question curation, schema discovery, SQL generation, AI-based safety validation, PostgreSQL execution, and response generation.
- Implemented tool-driven ETL workflows capable of API extraction and Pandas transformations, with outputs available in CSV, JSON, and Parquet formats.

PROFESSIONAL EXPERIENCE

Reva Technologies	Jun 2025 - Jul 2025
Data Science Intern	
- Analysed climate datasets using Python and SQL for rainfall forecasting. - Built and evaluated machine learning models for weather prediction. - Performed data preprocessing and feature engineering to improve prediction accuracy	

ASSESSMENTS / CERTIFICATIONS

Python for Data Science, AI & Development	Jul 2026
IBM via Coursera	
- Completed IBM's Python for Data Science, AI & Development certification via Coursera. - Gained hands-on experience with Python, NumPy, Pandas, and Jupyter Notebook for data analysis. - Applied data manipulation, visualization, and programming concepts to solve real-world analytical problems.	

Tata - Data Visualisation Job Simulation	Jul 2025 - Jul 2025
Forage	
- Developed data-driven business scenarios. - Designed impactful visualizations for stakeholders. - Presented business insights through dashboards. - Supported data-driven decision-making with analytical findings.	

AWARDS AND SCHOLARSHIPS

Cognition 2025 - Secured Second Prize among competing teams at Cognition 2025.Led end-to-end planning and execution of an AI-powered healthcare platform.Presented the solution before judges and faculty.Collaborated with a multidisciplinary team to deliver the project successfully.	
---	--

COCURRICULAR ACTIVITY

Student Council	Led coordination between students and faculty, demonstrating leadership, communication, teamwork, and
(Class Representative	organizational skills while managing academic activities and student concerns.
(CR))	
Jul 2024 - May 2025
